Preparing for a divorce can be complex and emotional, touching on the most intimate aspects of one's life and future. It's essential to understand the legal and financial implications of divorce while also considering the well-being of everyone involved, particularly when children are affected.

While divorce marks the end of one chapter, it also signifies the beginning of another. The journey ahead, with its inevitable trials, can still be navigated with compassion for yourself and others.

For many, this period of preparation can be supported by a combination of friends, family, professional counselors, and [Onward™](#) as you navigate the emotional and practical landscape of ending a marriage.

Preparing for Divorce

# FINANCIAL

**Getting divorced can have a significant impact on your finances.** To finalize a divorce or end a civil partnership, you'll need to untangle your income, assets, debts, and expenses. If you and your spouse can reach an agreement on dividing money, property, and expenses, you can potentially avoid costly and time-consuming court proceedings.

Financial factors include joint debt, child support, housing arrangements, and budgeting. You'll need to consider the division of savings, pensions, property, and responsibility for debts while also keeping in mind your future earning potential and the needs of any children.

Tax implications are another essential aspect. Transfers of assets between spouses during divorce are typically tax-free, but this must be completed within a set timeframe to avoid taxes. Educating yourself about how to handle investment or property sales, pensions, and inheritance can help prevent unexpected tax liabilities.

Managing these financial issues requires careful planning, research, and often professional advice to ensure a fair outcome for both parties. **At Onward, we understand how overwhelming this process can be and are [here to help](#).**

Preparing for Divorce

**LEGAL**

**On the legal front,** important elements include residency requirements, grounds for divorce, property division, child custody, and support. Seeking legal advice and considering alternative dispute resolution options can significantly assist in navigating the process.

The first legal considerations are residency requirements and venue, as you must ensure you meet the criteria in your state or county to file for divorce. Additionally, it's essential to understand your state's allowable options for the reasons for your divorce. You need to know if you can cite "irreconcilable differences" between you and your spouse ("no-fault") or if you are permitted to cite reasons like adultery or abandonment ("fault-based").

Many legal aspects are closely tied to financial ones. When it comes to property division, it's vital to know the difference between marital and separate property and whether your state follows equitable distribution or community property laws. You should also understand the role of prenuptial or post-nuptial agreements in property division. Another legal/financial consideration is the expense of legal fees and court costs.

Child custody and support are, of course, crucial. You and your spouse will determine legal and physical custody arrangements, and make decisions on child support guidelines based on legal guidelines, income, and custody arrangements.

# Legal Preparation

- Understand Your State's Divorce Laws:** Research residency requirements for filing for divorce in your state, determine whether the state follows community property or equitable distribution rules, and learn about grounds for divorce (no-fault vs. fault-based).
- Address Child Custody and Parenting Plans:** Create an outline of a parenting plan for visitation and decision-making, and understand the child support guidelines in your state.
- Consider Consulting with a Divorce Attorney:** Research and seek out a reputable divorce attorney. If you determine that's right for you, during the initial consultation, discuss your legal rights and strategy and ask about alternative dispute resolution (ADR) methods like mediation.
- Mediation or Negotiation:** Determine if mediation is required where you live. If you and your spouse want to settle disputes outside of court, consider hiring a divorce mediator.
- Secure Important Documents:** Collect and securely store copies of important documents such as marriage certificates, birth certificates for children, social security cards, passports, property deeds, and loan agreements.
- Protect Your Privacy:** Update the passwords for your email, social media, and online financial accounts. Consider creating a new email address for sensitive communications during the divorce.
